Visa: Post Study Work Visa (Until May 2029)

PROFESSIONAL SUMMARY

- Software Engineer with over 6 years of experience in software development ranging from verifying complex systems such as automotive ECU components to insurance technology SaaS platforms. Experienced tester executing manual and end-to-end automated testing frameworks. Recently completed a Master of Applied Management in NZ, combining advanced technical skills in TypeScript, Node.js, and Python with a strategic business mindset. Available to start work with 2 weeks notice.

EXPERIENCE

- **Orcas Consulting Ltd.** Raglan, New Zealand
Software Engineer Intern Nov. 2025 – Feb. 2026
 - **Tide Forecasting for fishermen and surfers:** Developed web scraping pipelines and modern interface components to support marine location analytics. Available at: <https://www.rippleforecast.com/tide>
 - **Web Scraping to reduce manual data collection time by 20+ hours:** Engineered Python-based scraping pipelines to extract structured data from third-party sources, eliminating over 20 hours of manual data collection.
 - **Optimized Map function loading speed by 4x:** Optimised interactive map responsiveness by implementing Map Marker Clustering for thousands of coastal points, resulting in a 4x faster initial map rendering speed.
 - **Reduced File Storage Size by over 90%:** Created Python Script to convert large GEO-JSON files into compressed ZARR format, reducing storage size by over 90% and improving data retrieval efficiency.
 - **Rapid Prototyping:** Utilised Replit AI to accelerate development cycles, cutting prototype turnaround times by 40% for cloud-based feature testing and collaborative deployment.
- **Evidentful** Cromwell, New Zealand
Junior AI Engineer Intern Dec. 2024 – Mar. 2025
 - **AI Search POC:** Designed and built a proof-of-concept for AI-powered search using hybrid keyword and vector retrieval with Meilisearch, demonstrating enhanced semantic search relevance.
 - **Vector Workflows:** Implemented vector search workflows to explore embedding-based retrieval, improving the system's ability to handle natural language queries accurately.
 - **Containerization:** Containerized applications using Docker to ensure consistent development, testing, and deployment environments across internal projects.
- **Manulife / John Hancock** Makati, Philippines
Full Stack Software Engineer Aug. 2021 – Sept. 2024
 - **Full Stack Dev:** Architected and deployed enterprise-grade features across microservices, secure APIs, and responsive UIs, supporting over 10,000+ policyholders. Available at: <https://www.coverme.com/travel-insurance/get-a-quote>
 - **Scrum Leadership:** Led Agile ceremonies as acting Scrum Master, facilitating sprint planning, stand-ups, reviews, and retrospectives to improve team delivery via Jira and MS Teams.
 - **Data Pipelines:** Engineered daily accounting data pipelines processing \$10k+ in transactions; eliminated force balance and tolerance issues to achieve 99.99% financial data accuracy.
 - **Frontend Frameworks:** Developed dynamic, responsive UI designs utilizing React, and Redux, reducing client-side page load times by 25% and improving user conversion rates.
 - **Automation Frameworks:** Built a scalable E2E automated testing framework using WebDriverIO and CI/CD pipelines, saving 10+ engineering hours per release.
- **Denso Ten Solutions** Pasig City, Philippines
Software Tester Aug. 2018 – July 2021
 - **Test Execution:** Designed and executed manual test cases based on automotive system specifications, ensuring 100% test coverage, with high software quality and close alignment with functional requirements.
 - **MATLAB Simulation:** Utilized MATLAB to generate test inputs and expected outputs, significantly improving test coverage and validation accuracy for vehicle parts by up to 30%.

- **Environment Configuration:** Built and configured secure testing environments using IBM Eclipse to support reliable, repeatable validation processes and system log tracking.
- **Client Collaboration:** Communicated with clients and prepared technical system documentation in Japanese, supporting international collaboration and project requirement clarity.
- **Technical Documentation for future users:** Authored comprehensive system configuration guides and reference manuals for future MATLAB and IBM Eclipse users, accelerating engineering onboarding speeds and reducing troubleshooting times by 40%.
- **Tools for improvement:** Created a custom flashcard tool to accelerate learning terminology mastery in Japanese. Available at: <https://github.com/gielo0111/excel-flashcards>

McDonald's

Auckland, New Zealand

Kitchen Crew

Nov. 2024 – Present

- **Adaptability:** Actively integrating into the New Zealand workforce while completing Master's studies, demonstrating strong work ethic, team collaboration, and local workplace adaptability.

PROJECTS

- **RippleForecast Tides (Internship):** Developed web scraping pipelines and modern interface components to support marine location analytics. Available at: <https://www.rippleforecast.com/tide>
- **CoverMe (Company Project):** Contributed to a full-stack transactional travel insurance platform handling automated quote computations. Available at: <https://www.coverme.com/travel-insurance/get-a-quote>
- **SQL Portfolio (Solo Project):** Designed relational databases and analytic dashboards built using Streamlit cloud. Available at: <https://gielofernandez-sql-project.streamlit.app/>
- **Employee Attrition Prediction(Masters:** Applied Logistic Regression modeling to human resources datasets for predictive workforce analytics during Master's coursework. Hosted on Kaggle: <https://www.kaggle.com/code/gelojoseph/predict-employee-attrition-w-logistic-regression>
- **English Subject Website(University:** Created a website containing the biographies of me and my teammates. Available at: https://gielo0111.github.io/LagLife_of_Toby_Peds_Gielo/
- **Reimagined Punta Riviera Resort Website(University):** Modernized and improved the user experience of Punta Riviera Resort website based on user experience principles we have learned. Available at : https://gielo0111.github.io/Punta_Riviera_Resort/

EDUCATION

Future Skills Academy International

Auckland, New Zealand

Master of Applied Management; Major in Business Information Systems

Oct. 2024 – Apr. 2026

University of Santo Tomas

Manila, Philippines

Bachelor of Science in Computer Science

June 2012 – July 2017

PROGRAMMING SKILLS

- **Languages:** TypeScript, JavaScript, Node.js, Python, Java, C/C++, SQL, VBA/VBS **Databases:** SQL, NoSQL, CosmosDB
- **Frameworks & Tools:** React, Redux, NextJS, NestJS, ExpressJS, Docker, Git, CI/CD, Jenkins, Postman
Testing: WebDriverIO, JMeter, NewRelic, TDD
- **AI & Cloud:** Meiliseach, Microsoft Azure (AZ-900), Replit, Lovable, GitHub Copilot **Methodologies:** Agile, Scrum Master, Jira

CERTIFICATIONS & LANGUAGES

- **Certifications:** Datacamp AI Fundamentals (2025), Microsoft Certified Azure Fundamentals AZ-900 (2023), AutoCAD Training (2018)
- **Languages:** English (Fluent), Japanese (JLPT N4), Korean (Basic)

MY INTEREST IN THIS ROLE

- **Experience with maritime analytics:** My recent internship at Orcas Consulting Ltd. involved developing web scraping tools and interface components for marine location analytics, which aligns with the maritime focus of this role. I was also fascinated by the how complex and dynamic nature of maritime data, and I am eager to apply my skills in this domain.
