

Gielo Joseph Fernandez

Auckland, New Zealand

New Zealand #:(+64) 22 153 5568

Email: gielo0111@gmail.com

LinkedIn: <https://www.linkedin.com/in/gielo0111> GitHub: <https://github.com/gielo0111>

Visa Status: New Zealand Post Study Work Visa (Full Work Rights Until 2029)

Professional Summary

Software Engineer with over 6 years of experience in Software development ranging from verifying complex systems such as Car's ECU parts and insurance Technology SaaS platforms. Experienced tester doing manual testing with the use of Excel, Eclipse, and Matlab to confirm compliance with customer specifications. I also have experience in building end-to-end automation tests using WebDriverIO library to provide reusable test cases for future use.

Recently completed a Master of Applied Management in NZ, combining advanced technical skills in TypeScript, Node.js, and Python with a strategic business mindset. **Currently on a 3-year Post-Study Work Visa and available to start with 2 weeks notice.**

Employment Summary

Orcas Consulting Ltd., Raglan, New Zealand

Software Engineer Intern

November 2025 – February 2026

Tasks and Responsibilities:

- Developed Python-based web scraping pipelines to automate the extraction of structured data from third-party sources, reducing manual data collection effort and enabling scalable data ingestion.
- Integrated the Overpass API to retrieve and process geospatial coordinates, supporting location-based analysis and improving data accuracy for internal tools.
- Contributed to the development of the company's new website using modern web technologies, enhancing usability and aligning with business requirements.
- Researched and evaluated geospatial data compression techniques (GeoJSON vs Zarr) to optimize storage and performance when handling large, complex datasets.
- Utilized Replit for rapid prototyping, testing, and collaborative development.

Key achievement: RippleForecast Tides Page <https://rippleforecast.com/tide> - April 30, 2026

Evidentful, Cromwell, New Zealand

Junior AI Engineer Intern

December 2024 – March 2025

Tasks and Responsibilities:

- Analyzed existing system architecture (frontend and backend) to identify performance and scalability improvement opportunities, delivering actionable recommendations to the development team.
- Designed and built a proof-of-concept for AI-powered search using hybrid (keyword + vector) retrieval with Meilisearch, demonstrating enhanced relevance and semantic search capabilities.
- Implemented vector search workflows to explore embedding-based retrieval, improving the system's ability to handle natural language queries.
- Containerized applications using Docker to ensure consistent development and deployment environments across projects.

Manulife/John Hancock, Makati, Philippines
Full Stack Software Engineer

August 2021 – September 2024

Tasks and Responsibilities:

- Designed, developed, and maintained full-stack applications, delivering new features across APIs, UIs, and backend services throughout the software development lifecycle.
- Collaborated with stakeholders to translate business requirements into technical solutions, refining specifications to ensure alignment with system capabilities and user needs.
- Led Agile ceremonies as acting Scrum Master, facilitating sprint planning, stand-ups, reviews, and retrospectives to improve team delivery and communication using Jira for documentation and Teams for communication.
- Identified process inefficiencies and proposed improvements to development workflows, contributing to more streamlined and effective engineering practices.
- Built and maintained reporting pipelines for daily accounting reports, ensuring data accuracy by resolving inconsistencies (e.g., force balance, tolerance issues).
- Diagnosed and resolved frontend and backend issues, improving system stability and reducing production defects.
- Contributed to system architecture and documentation, supporting scalability and maintainability of enterprise applications.
- Applied Agile methodologies to manage tasks, prioritize deliverables, and support iterative development in a cross-functional team environment..
- Delivered responsive UI design, prominent frontend framework such as React or Vue, state management, asynchronous API calls, authentication and single page application.
- Turned emerging technologies into practical, scalable solutions, while applying strong engineering standards and a quality-first mindset.
- Designed, and maintained robust automated test frameworks and scripts to support scalable and repeatable testing across cloud applications using WebdriverIO library.
- Translated user stories, acceptance criteria, and technical requirements into comprehensive test cases and test scenarios.
- Contribute to testing strategies and test plans, perform end to end testing, regression testing, analyzed test results.

Key achievement: Go Live <https://www.coverme.com/travel-insurance/get-a-quote> - October 2, 2023

Denso Ten Solutions, Pasig City, Philippines
Software Tester

August 2018 – July 2021

Tasks and Responsibilities:

- Designed and executed manual test cases based on system specifications, ensuring software quality and alignment with functional requirements.
- Utilized MATLAB to generate test inputs and expected outputs, improving test coverage and validation accuracy.
- Built and configured testing environments using IBM Eclipse to support reliable and repeatable validation processes.

- Identified, debugged, and documented defects using Eclipse, contributing to faster issue resolution and improved system stability.
- Tracked and reported defects, ensuring timely resolution and clear documentation for future reference and regression testing.
- Collaborated with cross-functional teams and participated in regular progress reporting, supporting transparency and on-time delivery of project milestones.
- Contributed to continuous improvement initiatives and internal knowledge sharing within the team.
- Communicated with clients and prepared technical documentation in Japanese, supporting international collaboration and requirement clarity..
- Validated resolved defects, enhancements, and newly delivered features to ensure they meet quality standards and do not introduce regressions.

Trend Micro, Inc., Pasig City, Philippines
Core Tech Engineer Trainee

July 2017 – January 2018

Tasks and responsibilities:

- Completed intensive training in low-level systems and cybersecurity, focusing on assembly programming and reverse engineering techniques.
- Analyzed malware behavior and contributed to pattern/signature creation for threat detection and classification.
- Investigated web and email-based threats, including spam and malicious URLs, to understand real-world attack vectors.
- Utilized tools such as VMware, OllyDbg, and Hiew to safely analyze and debug malicious binaries in controlled environments.
- Performed dynamic and static analysis using sandboxing and system tracing tools to observe malware execution and system impact.

Rogomi, Inc, Pasig City, Philippines
Intern

May 2015 – July 2015

Tasks and responsibilities:

- Documented mobile application features and workflows to support development and QA processes.
- Performed initial quality assurance testing, identifying and reporting defects to improve application stability.
- Completed training in Android development using Android Studio and Java, building foundational knowledge in mobile application development.

Mcdonalds, Auckland, New Zealand
Kitchen Crew

November 2024 – Present

Tasks and Responsibilities:

- Actively integrating into the New Zealand workforce while completing Master's studies, demonstrating strong work ethic and adaptability.
- Maintaining high-speed service and accuracy in a fast-paced, high-pressure environment.
- Collaborating effectively within a diverse team to ensure operational efficiency and customer satisfaction.

Key Skills

- **MS Office:** Word, Excel, PowerPoint, VBS, PowerBI, Outlook
- **Analytics:** RapidMiner, Microsoft PowerBI

- **Programming:** JavaScript (TypeScript, NodeJS, React, Redux, NextJS, NestJS, ExpressJS, AngularJS), Java, C/C++, Python, VBA/VBS
- **Developmental and Tools:** Git, Docker, CI/CD, Jenkins, Swagger, Postman, API (REST, GraphQL)
- **AI:** MeiliSearch (AI Driven Search Optimization), Replit, Lovable
- **Databases:** SQL, NoSQL, CosmosDB
- **Cloud & DevOps:** Microsoft Azure, Github Copilot, Automated CI/CD Pipelines
- **Testing & Automation:** WebDriverIO, JMeter, NewRelic, Test-Driven Development
- **Others:** Agile, Scrum, Adobe Experience Manager, Jira, Confluence, CRM, ERP, Dashboards and Analytics Tools

Education and Qualifications

Master's in Applied Management
Major in Business Information Systems
Future Skills Academy International, New Zealand

October 2024 - April 2026

Diploma in Bachelor of Science in Computer Science
University of Santo Tomas, Philippines

June 2012 - July 2017

Certifications

Fundamentals Certification: AI Fundamentals , Datacamp	August 2025
Microsoft Certified: Azure Fundamentals AZ-900 , Microsoft Learn	August 2023
Japanese Language Proficiency Test (JLPT) N4 , The Japan Foundation	July 2023
Korean 2 , UP Diliman Department of Linguistics	July 2023
AutoCAD Training , MFI Polytechnic Institute, Inc.	December 2018
English Conversation Fluency 3 , SpeechPower Cubao	December 2014
