Visa: Post Study Work Visa (Until May 2029)

PROFESSIONAL SUMMARY

- Customer-centric and technically fluent professional with over 6 years of international experience bridging the gap between users, business workflows, and complex software solutions. Expert at troubleshooting technical anomalies, managing cross-functional workflows, and supporting client systems. Recently completed a Master of Applied Management in New Zealand, combining advanced analytical capabilities with strong stakeholder communication skills. Adaptable, service-driven, and available immediately with a 2-week notice period.

EXPERIENCE

- **Orcas Consulting Ltd.** Raglan, New Zealand
Software Engineer Intern Nov. 2025 – Feb. 2026
 - **Process Automation:** Developed automated data pipelines to extract structured information, removing manual workloads and improving operational efficiency for internal teams.
 - **Data Accuracy:** Integrated location-based APIs to clean and verify geospatial data coordinates, significantly enhancing data precision for cross-functional tools.
 - **User Experience:** Contributed directly to the deployment of the company's new website, ensuring design layouts matched core user needs and business requirements.
 - **Business Analysis:** Evaluated technical data compression options to balance system performance with organizational storage costs, providing actionable choices to management.
 - **Collaboration:** Utilized cloud-based prototyping tools to facilitate rapid, transparent team testing and shared environment development.
- **Evidentful** Cromwell, New Zealand
Junior AI Engineer Intern Dec. 2024 – Mar. 2025
 - **Systems Analysis:** Analyzed frontend and backend application frameworks to identify user-facing performance bottlenecks, delivering actionable recommendations to the product team.
 - **User Support POC:** Designed and built a search tool proof-of-concept aimed at resolving complex customer queries more accurately using natural language interpretation.
 - **Workflow Optimization:** Implemented semantic data workflows to explore search relevance, optimizing the application's response capabilities for end-user inquiries.
 - **Environment Control:** Utilized environment isolation tools to maintain reliable, predictable software behavior across different user operational setups.
- **Manulife / John Hancock** Makati, Philippines
Full Stack Software Engineer / Technical Coordinator Aug. 2021 – Sept. 2024
 - **Application Support:** Maintained full-stack applications across the complete product lifecycle, balancing feature delivery with direct bug fixes and continuous user service support.
 - **Team Coordination:** Stepped up as acting Scrum Master, leading daily syncs, coordinating operational updates, and tracking support tasks using Jira and MS Teams.
 - **Issue Resolution:** Investigated and resolved systemic inconsistencies and data accounting conflicts in daily reporting pipelines, ensuring data fidelity for external stakeholders.
 - **Interface Usability:** Delivered responsive interface layouts to maximize user accessibility, managing application state and clean integration with backend services.
 - **Quality Assurance:** Designed and deployed automated verification frameworks to catch, log, and eliminate software anomalies before impacting final users.
- **Denso Ten Solutions** Pasig City, Philippines
Software Tester / Client Liaison Aug. 2018 – July 2021
 - **Quality Verification:** Executed rigorous manual system tests against strict product specifications to guarantee stability and functional alignment with product goals.

- **Simulation Analytics:** Generated system behavior inputs and outputs to evaluate technical system boundaries, driving up test coverage and system stability metrics.
- **Problem Diagnostics:** Configured isolated verification environments and monitored system logs to isolate, track, and diagnose unexpected technical anomalies.
- **International Relations:** Communicated closely with international clients and translated product requirements into clear system documentation in Japanese, easing global cross-team delivery.

- **McDonald's** Auckland, New Zealand
Kitchen Crew *Nov. 2024 – Present*
 - **NZ Workplace Adaptability:** Successfully integrated into the local workforce while handling postgraduate studies, proving a strong work ethic and team collaboration under pressure.

PROJECTS & PORTFOLIOS

- **RippleForecast Tides (Internship):** Developed automated information feeds and user-friendly interface components to support location-based marine analytics and client planning tools. Available at: <https://www.rippleforecast.com/tide>
- **CoverMe (Transactional Platform):** Contributed to a customer-facing full-stack transactional travel insurance application designed to automate policy quotes and client calculations. Available at: <https://www.coverme.com/travel-insurance/get-a-quote>
- **Interactive Data Portfolio (Solo Project):** Designed relational databases and built easy-to-read analytic dashboards hosted via cloud applications to present complex data visually. Available at: <https://gielofernandez-sql-project.streamlit.app/>
- **Workforce Analytics Modeling (Master's Project):** Applied data forecasting methodologies to organizational human resources datasets to analyze and predict employee retention trends during postgraduate coursework. Hosted on Kaggle: <https://www.kaggle.com/code/gelojoseph/predict-employee-attrition-w-logistic-regression>
- **Collaborative Team Profile (University Project):** Created a responsive team introductory portal focused on clean web structure, collaborative content layout, and team storytelling. Available at: https://gielo0111.github.io/LagLife_of_Toby_Peds_Gielo/
- **Resort Portal UX Modernisation (University Project):** Redesigned and modernized a business website interface based on practical user experience (UX) and digital accessibility guidelines. Available at: https://gielo0111.github.io/Punta_Riviera_Resort/

EDUCATION

- **Future Skills Academy International** Auckland, New Zealand
Master of Applied Management (Major in Business Information Systems) *Oct. 2024 – Apr. 2026*
- **University of Santo Tomas** Manila, Philippines
Bachelor of Science in Computer Science *June 2012 – July 2017*

CORE SKILLS & CORE COMPETENCIES

- **Methodologies & Tools:** Agile/Scrum, Acting Scrum Master, Jira, MS Teams, MS Office Suite, Documentation **Customer Support & QA:** Helpdesk Support, Manual System Testing, Troubleshooting, Log Tracking
- **Systems & Architecture:** Business Systems Analysis, Data Validation, Environment Configuration, Workflow Automation **Cloud & AI Tools:** Microsoft Azure (AZ-900), Meilisearch, Docker, Postman, GitHub Copilot
- **Data & Technical Fluency:** SQL, Python, JavaScript, TypeScript, Node.js, React, relational databases

CERTIFICATIONS & LANGUAGES

- **Certifications:** DataCamp AI Fundamentals (2025), Microsoft Certified Azure Fundamentals AZ-900 (2023), AutoCAD Professional Training (2018)
- **Languages:** English (Fluent), Japanese (Conversational - JLPT N4), Korean (Basic)
