Visa: Post Study Work Visa (Until May 2029)

PROFESSIONAL SUMMARY

- Full-Stack Software Engineer with 6+ years of experience architecting and delivering production applications across InsurTech and automotive sectors. Proven track record of measurable impact: optimized frontend performance by 25%, reduced data storage costs by 90%, and engineered financial pipelines achieving 99.99% accuracy. Recently completed a Master of Applied Management in NZ, combining deep technical expertise in TypeScript, React, Node.js, and Python with strategic business thinking. Available to start in 2 weeks. Full NZ work rights until 2029.

KEY HIGHLIGHTS

- **Impact:** 4x map performance improvement — 90% storage reduction — 99.99% data accuracy — 25% faster page loads
- **Scale:** Architected systems serving 10,000+ policyholders — Processed \$10,000+ daily transactions
- **Tech Stack:** TypeScript, React, Node.js, Python, Docker, Azure (Certified)

EXPERIENCE

- **Orcas Consulting Ltd.** Raglan, New Zealand
Software Engineer Intern Nov. 2025 – Feb. 2026
 - **Tide Forecasting for fishermen and surfers:** Developed web scraping pipelines and modern interface components to support marine location analytics. Available at: <https://www.rippleforecast.com/tide>
 - **Web Scraping to reduce manual data collection time by 20+ hours:** Engineered Python-based scraping pipelines to extract structured data from third-party sources, eliminating over 20 hours of manual data collection.
 - **Optimized Map function loading speed by 4x:** Optimised interactive map responsiveness by implementing Map Marker Clustering for thousands of coastal points, resulting in a 4x faster initial map rendering speed.
 - **Reduced File Storage Size by over 90%:** Created Python Script to convert large GEO-JSON files into compressed ZARR format, reducing storage size by over 90% and improving data retrieval efficiency.
 - **Rapid Prototyping:** Utilised Replit AI to accelerate development cycles, cutting prototype turnaround times by 40% for cloud-based feature testing and collaborative deployment.
- **Evidentful** Cromwell, New Zealand
Junior AI Engineer Intern Dec. 2024 – Mar. 2025
 - **AI Search POC:** Designed and built a proof-of-concept for AI-powered search using hybrid keyword and vector retrieval with Meilisearch, demonstrating enhanced semantic search relevance.
 - **Vector Workflows:** Implemented vector search workflows to explore embedding-based retrieval, improving the system's ability to handle natural language queries accurately.
 - **Containerization:** Containerized applications using Docker to ensure consistent development, testing, and deployment environments across internal projects.
- **Manulife / John Hancock** Makati, Philippines
Full Stack Software Engineer Aug. 2021 – Sept. 2024
 - **Full-Stack Architecture:** Architected and deployed enterprise-grade features across microservices, REST APIs, and React-based UIs, serving 10,000+ policyholders on a transactional insurance platform. <https://www.coverme.com/travel-insurance/get-a-quote>
 - **ETL & Data Engineering:** Engineered daily ETL pipelines processing \$10,000+ in financial transactions, implementing reconciliation logic that eliminated force-balance errors and achieved 99.99% data accuracy.
 - **Frontend Performance Optimization:** Optimized client-side performance by 25% through React/Redux state management, code splitting, and lazy loading, directly improving user conversion rates.
 - **Test Automation & CI/CD:** Designed and implemented a WebDriverIO-based end-to-end test automation framework integrated with CI/CD pipelines, reducing manual regression testing by 10+ hours per release.

- **Agile Leadership:** Served as acting Scrum Master for a cross-functional team, facilitating sprint planning, daily stand-ups, and retrospectives to improve delivery velocity and team alignment.

Denso Ten Solutions

Pasig City, Philippines

Embedded Software Engineer

Aug. 2018 – July 2021

- **Embedded Systems Validation:** Developed and executed validation test cases for automotive ECU components, ensuring 100% test coverage and compliance with functional safety requirements for vehicle systems.
- **Test Automation & MATLAB:** Engineered MATLAB-based scripts to automate test input generation and output validation, improving test coverage and verification accuracy by 30%.
- **Environment & Infrastructure:** Architected and maintained secure test environments using IBM Eclipse and system log tracking tools, enabling reliable, repeatable validation processes for mission-critical systems.
- **Technical Documentation & Client Collaboration:** Delivered comprehensive technical documentation and system configuration guides in Japanese, directly collaborating with international clients to align requirements and accelerating team onboarding by 40%.

PROJECTS

- **RippleForecast Tides (Internship):** Built Python web scraping pipelines and optimized map rendering with clustering for 4x faster performance. <https://www.rippleforecast.com/tide>
- **CoverMe Travel Insurance (Company Project):** Full-stack transactional platform with automated quote computations serving 10,000+ policyholders. <https://www.coverme.com/travel-insurance/get-a-quote>
- **SQL Analytics Dashboard (Solo Project):** Designed relational databases and built interactive dashboards using Streamlit for data visualization. <https://gielofernandez-sql-project.streamlit.app/>

EDUCATION

- **Future Skills Academy International** Auckland, New Zealand
Master of Applied Management; Major in Business Information Systems *Oct. 2024 – Apr. 2026*
- **University of Santo Tomas** Manila, Philippines
Bachelor of Science in Computer Science *June 2012 – July 2017*

PROGRAMMING SKILLS

- **Backend Development:** Node.js (NestJS, Express), Python, Java, REST APIs, Microservices, ETL Pipelines
- **Frontend Development:** React, Redux, Next.js, TypeScript, JavaScript, Responsive UI, Performance Optimization
- **Testing & Quality:** Test Automation (WebDriverIO), TDD, CI/CD Integration, Manual Validation (MATLAB)
- **DevOps & Cloud:** Docker, Jenkins, CI/CD Pipelines, Microsoft Azure (AZ-900 Certified), Git
- **Databases:** SQL, NoSQL, CosmosDB
- **AI & Emerging Tech:** Meilisearch (Vector Search), Replit, GitHub Copilot
- **Methodologies:** Agile, Scrum (Scrum Master Experience), Jira, Confluence

CERTIFICATIONS & LANGUAGES

- **Certifications:** Datacamp AI Fundamentals (2025), Microsoft Certified Azure Fundamentals AZ-900 (2023), AutoCAD Training (2018)
- **Languages:** English (Fluent), Japanese (JLPT N4), Korean (Basic)
