Email : gielo0111@gmail.com
Mobile : (+64) 22 153 5568
Visa: Post Study Work Visa (Until May 2029)

Professional Summary

- Quality Engineer with 6+ years of experience in software testing, quality assurance, test automation and software development across enterprise platforms and financial services. Strong expertise in manual and automated testing, test case design, defect tracking, and API testing. Experienced in working from evidence; production logs, raw payloads, and third-party integrations, rather than just UI-based testing. Proven track record of achieving 100% test coverage and improving validation accuracy by 30%. Comfortable with systems I don't fully control and skilled at working out whose side a problem sits on. Full NZ work rights until 2029. Available to start immediately.

Key Highlights

- **Testing Impact:** 100% test coverage — 99.99% data accuracy — 30% improved validation accuracy — 10+ hours saved per release
- **Testing Expertise:** Manual Testing, Automated Testing, Regression Testing, Integration Testing, REST API Testing, Test Case Design, Test Strategy, Defect Tracking, Exploratory Testing
- **Evidence-Based Testing:** System Log Analysis, Raw Payload Inspection, API Testing, Third-Party Integrations
- **Methodologies:** Agile, Scrum (Scrum Master)
- **Automation & Tools:** WebDriverIO, Selenium, Playwright (familiar), Jest, SQL, Git, CI/CD Pipelines, Docker
- **Availability:** Available to start immediately — Full NZ work rights until 2029

Experience

- **Denso Ten Solutions** — Pasig City, Philippines
  Software Quality Engineer — *Aug. 2018 – July 2021*
  - **Manual & Automated Testing**: Designed and executed comprehensive test cases for automotive ECU components, ensuring 100% test coverage and compliance with functional safety requirements. Performed integration, regression, and system testing.
  - **Evidence-Based Testing**: Identified, documented, and tracked software defects using system log analysis and raw data inspection. Provided clear, evidence-based feedback to developers for timely resolution, naming impact rather than just symptoms.
  - **Defect Tracking & Reporting**: Identified, documented, and tracked software defects using Eclipse and system log tracking tools, providing clear feedback to developers for timely resolution.
  - **Test Automation**: Engineered MATLAB-based scripts to automate test input generation and output validation, improving test coverage and verification accuracy by 30%.
  - **Quality Documentation**: Authored comprehensive test documentation and system configuration guides, reducing troubleshooting times by 40% and accelerating team onboarding.
  - **Client Communication & Documentation**: Communicated with international clients and prepared technical reports in Japanese. Supported team onboarding through comprehensive training materials, demonstrating strong communication and knowledge-sharing skills.
- **Manulife / John Hancock** — Makati, Philippines
  Full Stack Software Engineer — *Aug. 2021 – Sept. 2024*
  - **Testing Strategy & Execution**: Designed comprehensive test strategies covering functionality, performance, and regression testing for enterprise insurance platform. Leveraged AI tools (GitHub Copilot) to accelerate test case generation and maintained clear documentation of test outcomes.

- **API Testing & Integration**: Tested REST APIs and GraphQL services at enterprise scale, verifying raw payloads and third-party integrations. Ensured data integrity and correct behaviour across microservices.
- **Full-Stack Architecture**: Developed and deployed enterprise-grade features across microservices, REST APIs, and React-based UIs, serving 10,000+ policyholders on a transactional insurance platform. https://www.coverme.com/travel-insurance/get-a-quote
- **ETL & Data Engineering**: Engineered daily ETL pipelines processing $10,000+ in financial transactions, implementing reconciliation logic that eliminated force-balance errors and achieved 99.99% data accuracy.
- **Client Support & Maintenance**: Managed website support tickets and performed routine maintenance, resolving client-reported issues and implementing feature enhancements with a focus on attention to detail and timely delivery.
- **Responsive Web Development**: Built responsive, accessible user interfaces for enterprise insurance platform, ensuring consistent experience across all devices and browsers for 10,000+ policyholders.
- **Agile Leadership**: Served as acting Scrum Master for a cross-functional team, facilitating sprint planning, daily stand-ups, and retrospectives to improve delivery velocity and team alignment.
- **Requirements Gathering & Stakeholder Management**: Collaborated with product management, design, and business stakeholders to gather requirements and translate business needs into technical solutions. Facilitated meetings and provided regular project updates.

- **Orcas Consulting Ltd.** Raglan, New Zealand
  Software Engineer Intern *Nov. 2025 – Feb. 2026*
  - **Industrial Data Platform (Time-Series Analytics)**: Built a data platform for marine location analytics, processing time-series tidal data for forecasting applications serving fishermen and surfers. Available at: https://www.rippleforecast.com/tide
  - **Data Engineering & ETL Pipelines**: Engineered Python-based ETL pipelines to scrape and process structured data from third-party sources, eliminating 20+ hours of manual collection.
  - **Optimized Map function loading speed by 4x**: Optimized data visualization by implementing Map Marker Clustering, achieving 4x faster rendering for thousands of real-time data points.
  - **Reduced File Storage Size by over 90%**: Converted large time-series GEO-JSON datasets into compressed ZARR format, reducing storage by 90% and improving retrieval efficiency for time-based queries.
  - **AI-Assisted Development & Testing**: Leveraged Replit AI and GitHub Copilot to accelerate development and testing cycles, cutting prototype turnaround times by 40% and improving test automation efficiency for cloud-based features.
- **Evidentful** Cromwell, New Zealand
  Junior AI Engineer Intern *Dec. 2024 – Mar. 2025*
  - **AI-Powered Testing & Search Solutions**: Built proof-of-concept for AI-powered search using hybrid keyword and vector retrieval. Applied AI-driven approaches to data discovery and natural language query processing, demonstrating ability to work with AI/agentic technologies.
  - **Data Processing Workflows**: Implemented vector search workflows to improve the system's ability to process and retrieve information from natural language queries.
  - **Containerization & Deployment**: Containerized applications using Docker to ensure consistent development, testing, and deployment environments across internal projects.

Projects

- **RippleForecast Tides (Internship Project, 2026)**: Built a time-series data platform processing tidal data for forecasting applications. Engineered Python ETL pipelines, optimized large datasets, and delivered real-time visualizations. https://www.rippleforecast.com/tide
- **CoverMe Travel Insurance (Enterprise Project, 2023)**: Full-stack transactional platform with React/TypeScript frontend serving 10,000+ policyholders. Implemented responsive UI, state management, and performance optimization. https://www.coverme.com/travel-insurance/get-a-quote
- **SQL Analytics Dashboard (Personal Project, 2026)**: Designed relational databases and built interactive dashboards using Streamlit for data visualization. https://gielofernandez-sql-project.streamlit.app/

Education

- **Future Skills Academy International** — Auckland, New Zealand
  Master of Applied Management; Major in Business Information Systems — *Oct. 2024 – Apr. 2026*
  - **Relevant Coursework**: Business Analytics, Information Systems Strategy, Data-Driven Decision Making, Project Management
- **University of Santo Tomas** — Manila, Philippines
  Bachelor of Science in Computer Science — *June 2012 – July 2017*
  - **Relevant Coursework**: Data Structures & Algorithms, Software Engineering, Database Systems, Operating Systems, Object-Oriented Programming

Technical Skills

- **Testing & QA**: Manual Testing, Automated Testing, Regression Testing, Integration Testing, REST API Testing, Test Case Design, Test Strategy, Defect Tracking, Exploratory Testing, Sonarqube
- **Evidence-Based Testing**: System Log Analysis, Raw Payload Inspection, Third-Party Integrations, Production Logs, API Testing
- **Automation Tools**: WebDriverIO, Selenium, Playwright (working knowledge), Jest, RestSharp (familiar)
- **Programming Languages**: JavaScript, TypeScript, Python, Java (working knowledge), C# (working knowledge), SQL, HTML, CSS
- **Databases**: SQL Server, T-SQL, Stored Procedures, Query Optimization, NoSQL, CosmosDB, Time-Series Data
- **DevOps & Cloud**: Microsoft Azure (AZ-900 Certified), Docker, Git, CI/CD Pipelines
- **Business & Consulting**: Requirements Gathering, Stakeholder Management, Documentation, Process Improvement, Client Communication
- **Methodologies**: Agile, Scrum (Scrum Master), Jira, Confluence, Full SDLC
- **AI & Emerging Tech**: GitHub Copilot, Replit AI, ChatGPT/Claude, AI-Assisted Test Generation, Agentic Workflows

Certifications & Languages

- **Certifications:** Datacamp AI Fundamentals (2025), Microsoft Certified Azure Fundamentals AZ-900 (2023), AutoCAD Training (2018)
- **Languages:** English (Fluent), Japanese (JLPT N4), Korean (Basic)
